
Datex II Roadworks Ontology

by Niklas Petersen

Utrecht, May 23rd 2018

Motivation: Linking Data

limbo-project.org

Mobility Data Marketplace - German Governmental Data Portal

- Every German state (16x) published Roadworks data
- nearly all publish **AlertC** Locations

LCL List necessary for consumption

Abstract

DATEX II is a multi-part Standard, maintained by CEN Technical Committee 278, CEN/TC278, (Road Transport and Traffic Telematics), see www.itstandards.eu. The first three Parts of the CEN DATEX II series (CEN 16157) have already been approved as Technical Specifications. These three Parts deal with the most mature and widely used parts of DATEX II: the modelling methodology (called Context and framework) as Part 1, Location referencing as Part 2 and the most widely used DATEX publication for traffic information messages (called Situation publication) as Part 3.

Table of Content

Classes

[AlertCLocation](#) [AlertCLocation](#) [Impact](#) [LinearExtension](#) [Location](#) [Period](#) [PrimaryLocation](#) [RoadWorks](#) [SituationRecord](#) [Validity](#)

AlertCLocation ^C [back to ToC or Class ToC](#)

IRI: <http://schema.mobivoc.org/AlertCLocation>

is defined by
<http://schema.mobivoc.org/>

An AlertCLocation description of a situation record.

is equivalent to
alert c location^C

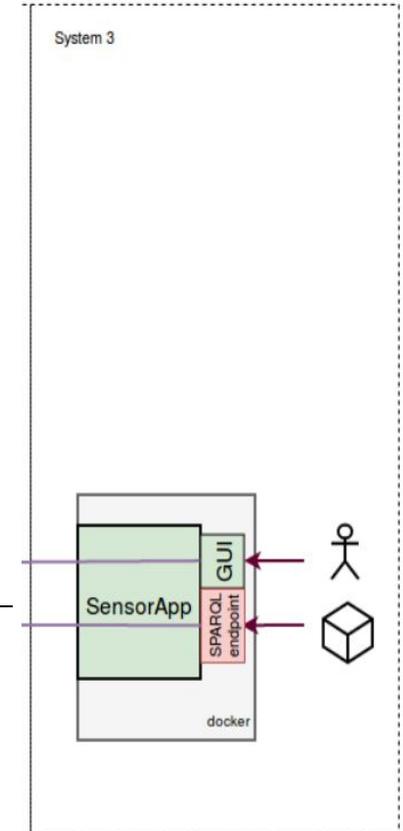

is in domain of
[countryCode](#)^{dp}, [primaryLocation](#)^{op}, [secondaryLocation](#)^{op}, [tableNumber](#)^{dp}, [tableVersion](#)^{dp}, [tableVersion](#)^{dp}

is in range of

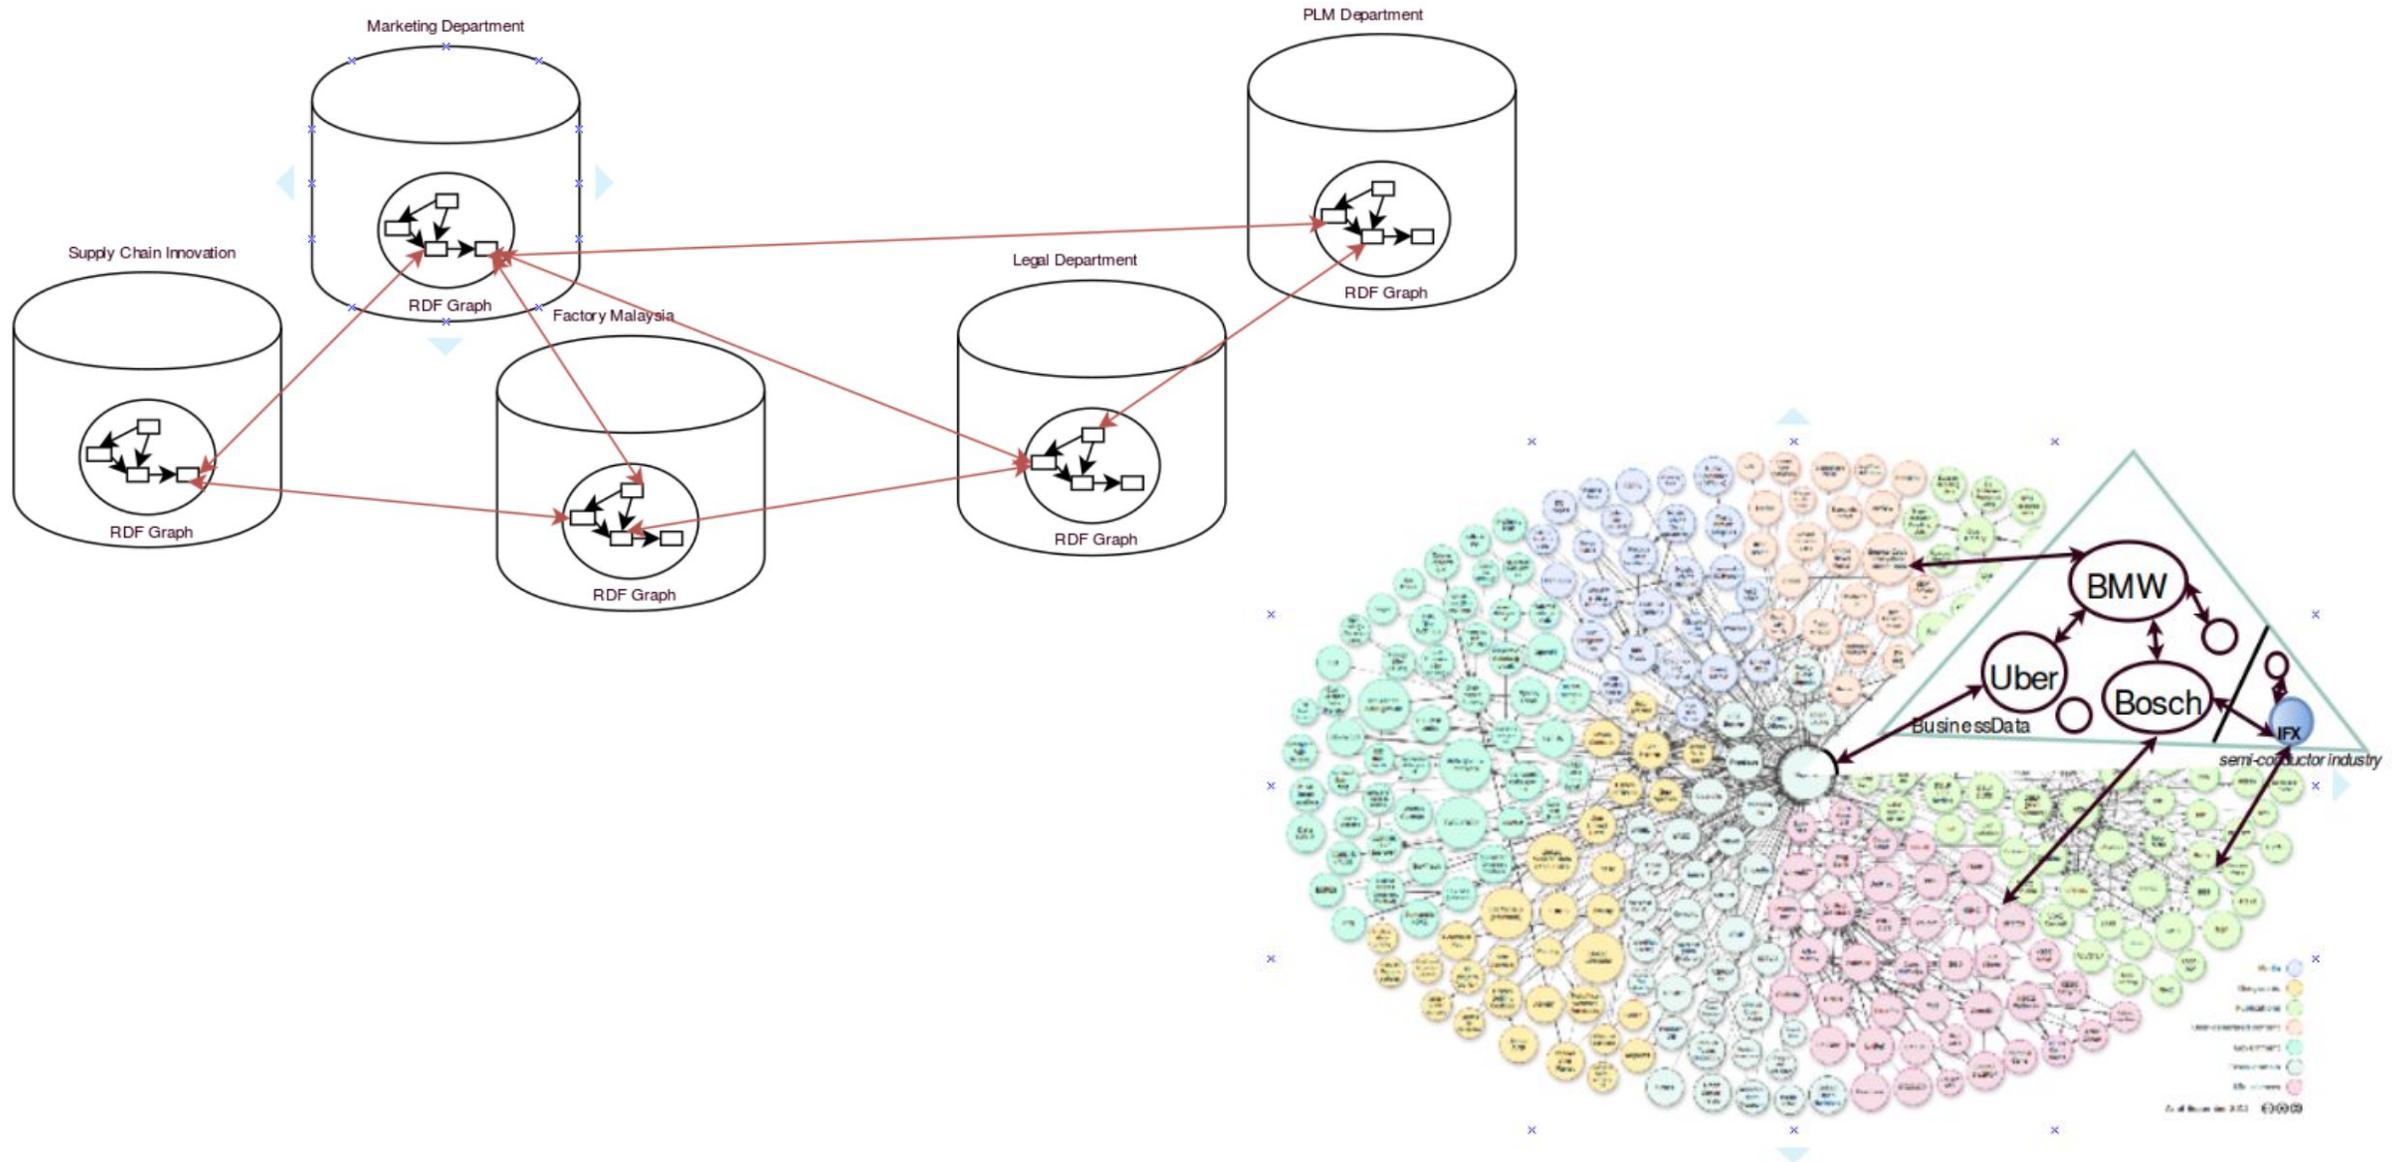

```

DATEX II - Online Demo

Lesson Learned

- **Datex II is hard**
- **LinearExtension > AlertCLocation**
 - lack of latitude/longitude information makes it harder for web developer to make use of the data
- **LCL** list is currently (in Germany) only via form accessible -> **open-source EU LCL list?**
